ABOUT THE COMPANY

IC Solution (ICS) is a digital service provider that aims to provide software, designing and marketing solutions to individuals and businesses. At ICS, we believe that service and quality is the key to success

We provide all kinds of technological and designing solutions from Billing Software to Web Designs or any custom demand that you may have. Experience the service like none other!

Some of our services include:

Development - We develop responsive, functional and super-fast websites.

We keep User Experience in mind while creating websites. A website should load quickly and should be accessible even on a small view-port and slow internet connection.

Mobile Application - We offer a wide range of professional Android, iOS & Hybrid app development services for our global clients, from a startup to a large enterprise.

Design - We offer professional Graphic design, Brochure design & Logo design. We are experts in crafting visual content to convey the right message to the customers.

Consultancy - We are here to provide you with expert advice on your design and development requirement.

Videos - We create a polished professional video that impresses your audience.

OVERVIEW OF THE PROJECT

Project Name: Tribute toDoctors

Team Members: Sujith AP

PriyaVarshini M

Ajay

George

This project is based on Web Development And its Applications. The main objective of this project is to learn the implementation of HTML, CSS and JavaScript. The basic webpage of this project is created using HTML and styling of the webpage is done using CSS.

Ever since industrialization started the care for plants has made it to our least priority list, Even though mankind requires plants to balance the food chain that he's a part of, but the plant enthusiasts are everywhere, be it big metropolitan cities or rural areas, so we aim to bring in a platform that can connect these plant/nature enthusiasts and help them exchange/sell them plants or donate seeds/plants as part of the green initiative that we started 2 years back.

Detail Summary

The most important feature of LEAF NOW is connecting enthusiasts, which means that users should be able to create an account on the site and can start filling a form to submit their services, which will later be published by our team if it is genuine. The second feature is encouraging users to sell/buy/donate plants/seeds, by letting them know the importance of the same. The third important feature is the discussion page, set up a discussion page for the enthusiasts to start a discussion on topics that they like (optional). As PDF for every donation, a donation can be money (1rs for every plant) requires you to convert web content to PDF encouraging other users to do the same.

TOOLS USED

Software Requirements

- Visual Studio Code 2019.
- Google Chrome or Microsoft Edge of latest version.
- Front End: HTML, CSS, JS (optional)
- Linux 7.1 or Windows XP/7/8/10 OS or MacOS
- Xampp Server

Hardware Requirements

- Pentium 200-MHz computer with a minimum of 64 MB of RAM (128 MB of RAM recommended).
- Monitor with a refresh rate of at least 40 Hz for a smooth GUI experience (optional).

IMPLEMENTATION

Source Code (index.HTML):

```

<!DOCTYPE html>

The image shows two screenshots of a web browser. The top screenshot displays a login form titled "Login Form" at the URL `localhost/leaf_now/login.php`. The form includes a text input for the username "Sujithap67", a password input field, a red "login" button, a "Home" link, and a "Not registered? Create an account" link. The bottom screenshot shows a checkout page at `localhost/leaf_now/checkout.php` for "LeafNow". It features a "Cart Summary" table with a subtotal of ₹125, free shipping, and a total of ₹125. Below the table, there are radio buttons for "Payment on delivery" (selected) and "Paypal". A green "Order now" button and a "Print Receipt" button are at the bottom.

The screenshot shows the Leaf Now admin dashboard. The left sidebar contains a menu with 'HOME' (Dashboard) and 'LOG' (Users, Store, Plant, Orders). The main content area is titled 'Dashboard' and displays four summary cards: Stores (2), Plants (6), Customer (1), and Orders (4). Each card has a corresponding icon (shopping bag, leaf, person, and shopping cart respectively).

The screenshot shows the Leaf Now admin dashboard with the 'Users' section selected. The main content area is titled 'All Registered users' and displays a table of registered users. The table has columns for Username, First-Name, Last-Name, Email, Phone, Address, Reg-Date, and Action. There is a search bar and a 'Show 10 entries' dropdown. The table shows one entry for 'Sujithap67'.
